Examiner's Statement of Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 1 and 16 are allowable for setting forth a pipe cutter comprising a slot-engaging gear having teeth keyed to teeth of a housing gear and the slot-engaging gear being sized such that one rotation of the slot-engaging gear results in one rotation of the housing gear. The slot engaging-gear further comprises a protrusion that extends beyond the teeth of the slot-engaging gear and engages a portion of a pipe slot once during each rotation of the slot-engaging gear and the housing gear.

Claim 5 is allowable for setting forth a pipe cutter comprising a plate spring member having a slot for receiving a portion of a cutting wheel and a retraction hook that selectively engages a shaft of the cutting wheel during rotation of a rotary head in a retracting direction and during rotation of the cutting wheel in a cutting direction. The retraction hook ratchets about a pivot pin.

Claim 11 is allowable for setting forth a pipe cutter comprising a plate spring member for receiving a portion of a cutting wheel, a retraction plate extending from the plate spring member and a retraction rod that selectively engages the retraction plate during rotation of a rotary head in a retracting direction.

For examples, Lazarevic (6,065,212) teaches a pipe cutter substantially as claimed except for slot engaging-gear having a protrusion that extends beyond the teeth of the slot-engaging gear and engages a portion of a pipe slot once during each rotation of the
